

Outdoor Learning & Forest School

Outdoor play has proven to have positive impacts on children's learning and well-being. Being outside in a natural environment gives the chance to connect with the natural world and experience life and growth. Children have the freedom to learn through movement in a space they do not have inside.

We provide daily opportunities for outdoor play and we are implementing Forest School approaches in the nursery grounds.

We will soon be implementing weekly Forest School sessions out with the nursery grounds within the local area. This is a very exciting time for Hillhead Nursery.

Remember - children will get muddy and messy while outside & they love it... We provide muddy suits to minimise the risk of ruining their own clothes.
